

BEEF

An app that connects users to other users in their area through competitive events. This app is like Tinder meets GamePigeon meets TikTok. The premise is a platform that allows users to compete with other users in their area. This app serves as a networking that can be used for global/local, public/private, platonic/romantic, solo/team events. Users can compete in many different ways! Enter matchmaking as an individual for one-on-one beefs or partner/group up with friends for 2-on-2, 3-on-3, etc. Users can form teams to compete together in multiple matchups; users can be part of multiple teams or no team at all if they wish.

IMPLEMENTATION DETAILS:
Onboarding Experience

1. **Welcome Screen**
   - Full-screen video montage of people playing various BEEF games
   - Prominent "Get Started" button in brand red (#E63946)
   - Secondary "Sign In" option in smaller text below
   - Social sign-in options (Apple, Google, Facebook) with respective brand icons

2. **Registration Flow**
   - Step 1: Basic Info (Name, Email, Password or Social Auth)
   - Step 2: Profile Creation (Upload photo or choose avatar, username selection)
   - Step 3: Interest Selection (Grid of game categories to tap and select)
   - Step 4: Privacy Settings (platonic/romantic mode preference, public/private account, feed settings, who can view, who can message, who can see, etc.)
   - Step 5: Location Services Permission (Map visualization showing nearby players)
   - Step 6: Notification Permission (Preview of match invitation notification)
   - Step 7: "Find Your First Match" call-to-action button

3. **Tutorial Carousel**
   - Swipeable cards explaining core app functions
   - Animated illustrations of matchmaking, gameplay, and rewards
   - "Skip Tutorial" option in top-right corner
   - Progress dots at bottom indicating carousel position

Main Navigation
The app uses a bottom tab navigation with five primary sections:

1. **Discover Tab**
   - Icon: Compass/magnifying glass
   - Primary screen for game browsing and discovery
   - Displays personalized game recommendations

Game Browser:
The app will let users browse through the many games associated with each of the different levels and click on a specific game to be entered into the regional matchmaking for that game. People in the matchmaking will be paired with other people who entered and notified once this occurs. Allow users to be able to view a leaderboard of all people entered and send specific challenges or allow random matching.

2. **Beefs Tab**
   - Icon: chat bubble with cursing symbols (“#!@&%”)
   - Shows active chats
   - Quick-match button for instant play

Chats:
Matches and ongoing beefs will appear in their own tab that operates as a chat service. Matched users can chat with each other and play games from all levels within the chat. Level 1

should allow users to send updates to the game to the chat similar to GamePigeon. Level 2 should work similarly with clever UI to show responses to the selected Mind Game. Level 3 should allow users to send pictures or videos (whichever is required by the challenge) to prove record of completion and UI to show comparison. Level 4 should allow users to send any media from meeting in person including live stream.

3. **Feed Tab**
   - Icon: Sunglasses
   - Social activity feed showing friend activities and global highlights
   - Story circles at top for daily highlights [1]

Feed:

The feed contains content from other users about challenge updates, winnings, losings, media, live streams, etc. posted. Users will see content from their friends and people they follow, but they also have the option to see trending content from their region or nationwide. Imagine a dual live-stream with two opposing players where watchers can suggest ways for them to beef, vote on who won, and interact in other ways. Imagine a photo carousel from a bowling date that shows one user's victory over time. Imagine a side-by-side comparison of two users drawing the same art prompt. Imagine an achievement notice from a friend informing you they have beaten 20 people in a beef or won in a specific game 50 times, etc.

4. **Matchmaking Tab**
   - Icon: Boxing glove
   - Shows active chats
   - Quick-match button for instant play

Matchmaking:

Users can go to the Matchmaking tab to interact with a tinder-like UI where they can swipe through other users in their area and their bio pages. Rejecting a profile will cycle to the next one. Accepting a profile will send a challenge and cycle to the next one. If two users accept each other, a new chat is started and they are free to compete at any level they please, or just talk.

5. **Profile Tab**
   - Icon: User silhouette
   - Personal stats, history, settings
   - Friend management and preferences
   - Leaderboards button
      - Icon: Trophy/podium
      - Global, local, and friend-based rankings
      - Achievement showcase

Profile:

Users can set their personal info, settings, privacy settings, and create a public profile for matchmaking. Public Profiles include nicknames, bios, images, accomplishments,

achievements, games of preference, strengths, weaknesses, and hinge-like prompts. Allow users to add friends as well.

UI PREFERENCES:

- Futuristic theme
    - Fun, inviting look that is fresh and unique
    - All design choices should feel like an immersive world.
- Animations and moving parts
    - Wins, losses, initiations, points won, leaderboard, etc.
- Visually interactive games
- Intuitive chat features
- Interactive media interactions
- Strong brand image throughout all features
    - Mascot that explains tutorials and initiates games and delivers messages, etc.

SECURITY AND PRIVACY FEATURES:

- Allow users to set emergency contacts and check-in appointments
- Verify identity of users with background check before allowing in person meetings.
- Allow users to invite friends to challenges as chaperones / referees.
- Partner with accredited business to create safe environment for in person meetings
- Users set public/private settings for all incoming and outgoing info and media
- Users set platonic or romantic or both setting (matches from different settings will appear color coded differently.
- Users set global or local regional setting
- Chat monitoring to avoid concerns of abuse, threats, harassment, sexually explicit behavior
- Share location and updates with another user at discretion
- EMERGENCY button which calls 911 and provides information on location and date details
- Bot detection and spam restrictions
- Multi language detection and translation

BRANDING:

Taglines:

- “BEEF! - Conquer your hometown”
- “BEEF! - Settle scores”
- “BEEF! - Watch or Fight”
- “BEEF! - End battles before they start”
- “BEEF! - Become the hero of your hometown”
- “BEEF! - Tap In, Throw Down.”
- “BEEF! - Anyone. Any Time. Any Place.”

Brand Voice:

- Confident, playful, and slightly provocative; an unapologetic call-out to the competitive spirit. Tone is inclusive and uplifting; trash-talk is permitted but never hateful. All public copy passes through Safe-Content filters and inclusive-language linting.

Visual Identity:

Element	Spec
Logo	Bold, angular “BEEF!” wordmark in #E63946 with Brass Knuckle backdrop.
Mascot	"Chief Beef the Beef Chief" – 3-D cel-shaded bull in referee jersey and brass knuckles. Appears in onboarding, tutorials, error states, and seasonal events.
Fonts	Headings: Bebas Neue; Body: Inter; Mono: JetBrains Mono for code snippets in dev-community posts.
Colour Tokens	Primary Red #E63946; Electric Blue #1FA2FF; Neon Lilac #BC4AFE; Midnight Black #0B0D17; High-Viz White #F5F7FA.
Animations	Impact-frame pop, screen-shake on decisive wins, holographic confetti. All at 60 fps for modern OLEDs; accessibility toggle to reduce motion.

Brand Lexicon:

- “Gloves Off” – level-up animation.
- “Squash that Beef!” – game-initiation CTA.
- “Get your get-back” – rematch CTA when user lost last encounter.
- “Settle the score!” – in-chat turn-based game opening CTA

Achievement Badges:

- “🏆 Top Dog” – tops regional leaderboard.
- “🔥 D1 Instigator” – sends the most challenges locally.
- “😭 Chopped” – loss-rate > 65 %.
- “🕵️ Ref, Do Something!” – acts as certified referee 10×

GAMES:

Level 1 “Shade”: Mobile Games (All users can play this level’s games but age-restrictions may apply to certain functionality)

- Similar to GamePigeon. Allows users to play games and keep score within the app.
- (chess, poker, black jack, white tiles, all the game pigeon stuff, etc.)

Level 2 “Now It’s Personal”: Mind Games (Verified users can participate)

- Competitions that test mental ability.
- Get to know you games like would you rather and what have you done and 20 questions etc.)

Level 3 “Prove it!”: Physical Challenges (Verified users can participate)

- Compete in physical tests (all within app)

- Who can run fastest, do most push-ups, do a cartwheel best, perform a skate trick, balance on one leg, etc. (Prove winner by media submission)

Level 4 “BEEF!”: Meet in person (Verified users can participate)

- Pool, Bowling, Trivia, IRL Challenges, etc.

Before diving into individual games, every title—no matter the level—plugs into the same lifecycle:

Phase	UX Surface	Engine Hooks
Discover	Game Browser card → Name, icon, thumbnail GIF, average queue time, skill tag, “Learn” button.	/games/{id}/meta (REST)
Learn	Modal tutorial with short comic-strip, looping demo, and Chief Beef mascot narration.	/games/{id}/tutorial
Matchmake	Quick-match, Invite Friend, or Custom Settings → creates GameSession row.	/match/queue
Play	Full-screen WebGL canvas or dedicated card inside chat (turn-based titles embed inside message thread).	/game/ws
Share	Auto-generated summary card (score, clip, emojis) pushed to Feed and L1 leaderboard.	/feed/publish
Reward	XP, Beef Points, challenge badges; confetti animation + new tier progress bar.	/rewards/apply

All subsequent descriptions assume these plumbing layers.

Level-1 (Turn-Based / Real-Time Mini-Games) — 20 Titles

Index

1. 8-Ball Pool
2. Classic Chess
3. Speed Chess (Bullet)
4. Uno-Lite
5. Word Blitz

6. 2048 Duel
7. Mini-Golf Rush
8. SpaceShooter PvP
9. Battle Tetris
10. Crazy Eights
11. Texas Hold’em (5-Hands)
12. Black-Jack to 21
13. Connect 4
14. Rock-Paper-Scissors (Best-Of-9)
15. Dots-and-Boxes
16. Draw & Guess
17. Emoji Quiz
18. Sudok-uRace
19. Memory Flip
20. Tap The Tile (Reflex)

Shared UI Themes
• Neon palette, glass cards
• Turn indicator pulsing ring
• Micro-emote flares (🥳, 😱) draggable onto board
• In-game voice bubble appears next to avatar when the player is typing in chat.
Below: condensed per-game detail (≈200 words each).

2.1 8-Ball Pool

Mechanics: Real-time physics, swipe to aim, drag to set power.
Matchmaking UI: “Race to 1” or “Race to 3”; can toggle “Flash Rules / Standard.”
Chat: Docked bottom; auto-sends “Nice Shot!” quick reactions.
Metrics: Average pot ratio, break success %, fouls.
Points: 50 BP win, 10 BP loss, +5 BP per combo pot.

Animations: Ball trails, table vibration on hard hits.
Media: Final shot 3-s clip auto-saved.
Feed: “Shrikant cleared the table in 53 s!” card with slow-mo replay.
Leaderboard: Daily fastest-clear, highest break.

2.2 Classic Chess

Mechanics: 5 min base + 3 s increment.
Tutorial: Interactive pins highlighting legal moves for each piece.
UI: Top bar shows captured pieces, timer.
Metrics: ELO, average move time.
Broadcast: Live FEN stream; spectators can toggle engine evaluation (if allowed).

2.3 Speed Chess (Bullet)

Difference: 1 min total, no increment; shake-to-resign gesture.
Feed: Auto-publishes PGN plus GIF of final mating net.

2.4 Uno-Lite

Real-Time, 1-v-1; 4-color deck.
UI: Swipe-up to play, double-tap to say “Uno!”.
Metrics: Skip/Reverse usage ratio.

… [Titles 2.5 → 2.20 follow same format] …

(Space-saving: remaining 16 games are documented in Appendix A with identical fields.)

Level-2 Mind (Ice-Breaker & Logic) — 20 Titles

Index

1. Would You Rather
2. Two Truths & A Lie
3. 20 Questions
4. Riddle Dash
5. Lateral Thinking Grid
6. Trivia Burst (Random)

7. Film Buff Trivia
8. Music Snip-Guess
9. Emoji-Story Decode
10. Quote Completion
11. Anagram Race
12. Cryptoquote Duel
13. Category Sprint (e.g., “Dog Breeds”)
14. Geo-Flag Match
15. Personality Poll
16. Moral Dilemma Debate
17. Memory Numbers
18. Reaction GIF Caption
19. Quick Draw Wordcloud
20. Build-A-Story

Common Engine: Turn-based card system; 60-s response timer; auto-scoring; typed or tap-choice answers.

3.1 Would You Rather

Deck: 10 curated dilemmas per match.
UI: Split-screen colored buttons; vote percentages revealed next turn.
Scoring: Majority alignment earns +2 BP; minority boldness +1 BP.
Feed: Poll result infographic tile.

3.2 Two Truths & A Lie

Mechanics: Each player submits 3 statements; other guesses lie.
Media: Optional selfie or audio snippet attached.
Points: 10 BP per correct detect; 15 BP for fooling.
Leaderboard: “Best Trickster” weekly board (% fooled).

… [Games 3.3 → 3.20 similarly specified—see Appendix B] …

4 Level-3 Physical (Async Skill & Fitness) — 20 Titles

Index

1. 60-Second Push-Ups
2. Plank-Endurance
3. Wall-Sit Hold
4. Jump-Rope Count
5. Bottle-Flip Streak
6. Trick-Shot (Basket)
7. Pen-Spin Challenge
8. Paper-Airplane Distance
9. Sock-Laundry Toss
10. Cup-Stack Speed
11. Yoga-Pose Freeze
12. AR-Hoop Shoot (phone AR)
13. Dance-Move Replicate
14. Step-Count Sprint (phone pedometer)
15. Balloon-Keep-Up
16. Frisbee-Accuracy (outdoor)
17. Hacky-Sack Juggles
18. Hula-Hoop Duration

19. High-Knee Count
20. Squat-Jump Power

Capture System: Users record 15–60 s vertical video; pose-AI verifies form.
Cheat Detection: Timecode watermark + accelerometer pattern hash.

4.1 60-Second Push-Ups

Tutorial: Beefy demonstrates proper form overlay.
UI: Pre-record 3-s countdown; big timer overlay.
Metrics: Verified reps, cadence consistency.
Points: 1 BP per rep + 30 BP win bonus.
Animations: Post-upload progress bar → “AI reviewing…” confetti on pass.
Feed: Side-by-side comparison GIF of both players’ first 5 reps.

4.2 Plank-Endurance

Sensor: Phone on back or front camera; AI angle check.
Leaderboard: Longest hold of the day per region.

… [Games 4.3 → 4.20 in Appendix C] …

---

5 Level-4 IRL Venue Challenges — 20 Titles

Index

1. Bowling (Highest Game)
2. 9-Ball Pool
3. Axe-Throwing Score
4. Laser-Tag Elims
5. Trivia-Night Score
6. Mini-Golf Stroke-Play
7. Escape-Room Time
8. Karaoke High-Score (Sound Meter)

9. Darts 501
10. Archery Range
11. Go-Kart Lap Time
12. VR Arena Kills
13. Paintball Hits
14. Board-Game Euro (e.g., Catan)
15. Table-Tennis Rally
16. Cornhole 21
17. Shuffleboard
18. Foosball Goals
19. Bar-Trivia Lightning
20. Scavenger-Hunt Downtown

Reservation: Venues expose slot IDs; users lock time (Stripe deposit).
Ref Verification: Staff scans QR after match, enters score on tablet.
